No. D.—937 OF 1921.

OFFICE OF THE SURGEON-GENERAL
WITH THE GOVERNMENT OF BOMBAY:

Poona, 15th April 1921.

From

MAJOR-GENERAL W. E. JENNINGS, M.D., M.L.C., K.H.P., I.M.S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
GENERAL DEPARTMENT, BOMBAY.

Sir,

I have the honour to submit, for the information of Government, the Triennial Report on the Asylums for the treatment of Insanes in the Bombay Presidency for the years 1918—1920.

Buildings and Repairs.

2. The annual repairs to the asylum buildings have been carried out by the Public Works Department and they are in good order.

3. During the triennium under review new works as detailed below were carried out at the several asylums:—

(1) At the Naupáda Asylum a block for 32 non-criminal male lunatics and two day sheds for lunatics were constructed. The bathing platforms in the Female wards were provided with trellis work and a raised foot-path was constructed between the steward's quarters and his cook-room. A channel was also excavated in the existing nulla to drain off the water.

(2) At the Ratnágiri Asylum three blocks of five cells each and one barrack to accommodate five insanes were provided in addition to certain minor additions and alterations such as paving with Shahabad stone in certain wards, provision of iron-barred doors in place of planked doors in certain cells, and pipe connection to sweepers' quarters.

(3) At the Central Lunatic Asylum, Yeravda, two brick-nogging buildings, which are used as day-rooms, were erected, and 20 single rooms were added to the male infirmary and 6 to block 38 in the Female section. The male leper section is almost completed and the quarantine block south of the asylum is approaching completion.

(4) At Dhárwár additional accommodation for lunatics was provided and new quarters for two Sub-Assistant Surgeons and additional quarters for servants were constructed.

(5) At Hyderabad new additional yards for males and females were provided.

Water-supply.

4. The supply of drinking water was good and sufficient at all the asylums. The Naupáda Asylum is provided with a pipe supply from the Tansa main and it is proposed to provide the Hyderabad Asylum with a pipe supply from the Indus.

STATEMENT NO. I.

Total Population.

5. The total population of the asylums in 1920 was 2,009 as compared with 2,071 in 1919 and 1,992 in 1918. The mean annual population for the triennium was 2,024 as compared with 1,833 in the previous triennium, an increase of 10·4 per cent. The average male population rose from 1,474 to 1,602 and the female population from 359 to 422, showing an increase of 8·7 per cent. and 1·7 per cent. respectively. The average European population was 101 against 95 in 1915—1917.

6. The admissions, including re-admissions, during the triennium averaged 542 males and 95 females against 510 males and 87 females in the preceding triennium.

7. The increase in the total population of the asylums and in the number of admissions is indicative of the growing tendency on the part of the general public towards resorting to asylums for the treatment of cases of mental diseases and speaks for the popularity of these institutions.

Daily average strength.

8. The daily average strength in 1920 was 1,430·9 as compared with 1,438·7 in 1919 and 1,405·4 in 1918. The mean daily average strength for the three years 1918—1920 was 1,425·0 against 1,274·6 for 1915—1917.

Discharges and Cures.

9. Of the total treated, on an average 253 males and 37 females were cured during the triennium as compared with 257 males and 28 females in 1915—1917.

10. Of the insanes returned as 'transferred to friends' the average number shown as 'improved' for 1918—1920 was 78 and 'not improved' 26 against 92 and 32 for 1915—1917.

Sickness.

11. The daily average number of sick treated in hospital in 1920 was 52·5 against 45·2 in 1919 and 50·7 in 1918, the mean for the triennium being 49·5 against 40·1. The percentage of sickness to the daily average strength was 3·6 in 1920 against 3·1 in 1919 and 3·5 in 1918, the average for the triennium being 3·4 against 3·1 for 1915—1917.

12. The increase in the average number of sick treated in hospital was due to the prevalence of influenza of a very virulent type at all the asylums during some time of the triennium under review. There was also an epidemic of cholera at the Naupada and Ahmedabad Asylums in 1919, and owing to the heavy rains during that year the inmates of the former in addition suffered a good deal from malaria and bowel complaints.

Mortality.

13. There were 176 deaths in 1920 against 216 in 1919 and 203 in 1918, the average mortality for the triennium being 198 against 109 for 1915—1917. The ratio of deaths to the daily average strength was 12·3 as compared with 15·0 in 1919 and 14·4 in 1918. The mean death-rate on the daily average strength during the years 1918—1920 was 13·9 against 8·5 in 1915—1917.

14. The following table shows the ratio per cent. of deaths to the daily average strength at the several asylums during the two triennia :—

Asylums.	1918.			1919.			1920.			Mean of 1918—1920.			Mean of 1215—1917.		
	M.	F.	T.	M.	F.	T.	M.	F.	T.	M.	F.	T.	M.	F.	T.

Ratnágiri	5·6	2·3	4·8	4·1	2·4	3·7	6·8	4·5	6·3	5·5	3·0	4·9	6·5	5·0	6·1
Central Lunatic Asylum, Yerávda. Europeans	2·9	8·9	5·3	11·6	3·7	8·2	11·1	4·3	8·0	8·5	5·6	7·2	6·6	8·9	7·5
Central Lunatic Asylum, Yerávda. Indians ...	3·3	1·8	2·8	11·5	8·6	11·0	14·3	8·7	12·9	9·7	6·4	8·9	6·1	4·8	5·8
Dhárwár	35·2	15·8	31·1	13·1	13·9	13·3	5·3	10·8	6·9	17·9	13·5	17·1	8·8	3·1	7·5
Ahmedabad	14·6	16·4	15·0	15·8	24·7	17·6	14·2	25·1	16·4	14·9	22·1	16·3	11·6	6·9	10·6
Hyderabad	48·4	66·7	50·6	22·3	52·0	24·0	18·8	21·3	19·0	29·8	47·3	31·2	14·2	22·9	15·1

15. The death rate at Ratnágiri was lower than during the previous triennium. There was a slight increase in the death rate among Indian insanes at the Central Lunatic Asylum, Yerávda, while that for European inmates remained practically unchanged. The high death rate at Naupáda was due to the prevalence of Cholera and Influenza in 1919 and to the high mortality from Dysentery (33), Diarrhœa (20), and Tubercle of lung and bowels (38). The rise in the death rate at Dhárwár is attributable mainly to the mortality from Influenza in 1918. Of the 40 deaths, which occurred in that year, 17 were due to this disease and 7 each to Tubercle of lungs and valvular disease of the heart. The increased mortality at Ahmedabad was due to the fact that a number of insanes were sent to the asylum in a very debilitated condition and died within few months of their admission. The chief cause of the high mortality at Hyderabad during the three years under report was malarial fevers which were prevalent all over Sind. This disease among the insanes is commonly complicated by bowel lesion causing Diarrhœa or Dysentery which is often fatal in persons already weakened by chronic nervous diseases of different types. Considerable difficulty was experienced in the diagnosis of certain cases with pyrexia of low type without rigors or sweats accompanied by œdema of the legs, scrotum and hands. Such cases occurred during the cold weather and were thought to be due to malaria, but no malarial parasites were found in the blood and quinine did no good. Some terminated fatally by the onset of diarrhœa, cardiac failure or œdema of the lung. The disease strongly suggests epidemic dropsy. The principal causes of death at the several asylums taken together were dysentery, diarrhœa and tuberculosis.

Statement No. II.

Criminal Lunatics.

16. The total number of criminal insanes confined in the asylums in 1920 was 250, of whom 233 were males and 17 females as compared with 207 males and 16 females in 1919 and 220 males and 14 females in 1918. The average population for the triennium was the same as that in the previous triennial period, *viz.*, 220 males and 16 females. The daily average strength was 189·5 against 184·0 in 1919 and 185·5 in 1918, the mean for the triennium being 186·3 against 180·4 in 1915—1917.

Statement No. III.

Religion, sex and residence of the insanes admitted.

17. Of the total admissions, including re-admissions, there were:—

	1918.	1919.	1920.	Average.	
				1918—1920.	1915—1917.
Hindus	350	330	343	341	308
Mahomedans	172	206	163	180	140
Europeans and Eurasians	61	65	37	54	60
Indian Christians	34	37	32	34	32
Other castes	29	22	21	24	23

Statement No. IV.

Previous occupation of the insanes admitted.

18. Military employees, including sepoys, followers, etc., numbering 192, furnished the largest number of admissions during the triennium under review. These were followed by domestic servants (175), labourers (132), merchants and traders (105), cultivators (98), mendicants and vagrants (76), and clerks (60).

Statement No. V.

Ages of insanes admitted.

19. The admissions and readmissions according to age were as follows:—

	1918.	1919.	1920.	Average.	
				1918—1920.	1915—1917.
Under 20	42	45	80	39	34
Between 20 and 40	525	540	441	502	461
Between 40 and 60	78	71	117	89	91
Upwards of 60	1	4	8	4	3

Statement No. VI.

Types of insanity.

20. The principal types of insanity treated during the triennium under review were idiocy 269, mania 2,819, malancholia 1,055, mental stupor 157, delusional insanity 607, insanity caused by *Cannabis Indica* or its preparations or derivatives 230, and dementia 723.

Statement No. VII.

Ætiological factors and associated conditions in the insanes admitted.

21. The principal predisposing and existing causes were mental stress 104 in 1920 against 111 in 1919 and 107 in 1918, the abuse of intoxicants 91 against 113 and 78, mental instability 47 against 36 and 69, and toxic diseases 20 against 60 and 29, respectively. Owing to insufficient history the causes of insanity were not ascertained in 264 cases as compared with 250 in 1919 and 292 in 1918.

Statement No. VIII.

Cash accounts.

22. The receipts from paying patients amounted to Rs. 71,863 as compared with Rs. 72,839 in 1919 and Rs. 67,722 in 1918, the average receipts for the triennium being

Rs. 70,808 against Rs. 57,803 in 1915—1917. The increase is attributable to the recovery of charges in respect of the maintenance and treatment of poor lunatics from the municipalities of the areas from which the lunatics are received. The value of stores received from the manufacturing department, less cost of raw materials, increased from Rs. 8,212 in 1918 to Rs. 9,443 in 1919 and Rs. 11,321 in 1920, the average value for the past three years amounting to Rs. 9,659 against Rs. 6,364 for 1915—1917. The increase was contributed mainly by the Yeravda and Naupada Asylums which supplied to their inmates vegetables, clothing and contingencies worth Rs. 10,260 and Rs. 6,188, respectively, during the triennium under report.

23. The total expenditure amounted to Rs. 6,63,151 against Rs. 5,73,086 expended in 1919 and Rs. 4,69,184 in 1918. Deducting the receipts from paying patients, the value of stores received from the manufacturing department and the amounts realised on account of the sale of goods to the public, etc., the net expenditure was Rs. 4,81,995 as compared with Rs. 3,96,014 in 1919 and Rs. 3,02,612 in 1918. Excluding the Public Works Department charges, the net expenditure for the triennium under review, as compared with the mean of the previous triennium, was :—

		Rs.
	1918	2,38,066
	1919	3,25,575
	1920	4,29,120
* Average ...	1918—1920	3,30,920
	1915—1917	2,06,065

24. The net cost per head of daily average strength was Rs. 300 against 226 in 1919 and Rs. 169 in 1918, the mean for the triennium being Rs. 232 as compared with Rs. 188 in the preceding three years. The increase in the cost per patient was due to higher prices under the heads of diet, clothing, bedding, contingencies, and increased expenditure under establishment charges in consequence of the revision of pay of the staffs at the several asylums.

Amusements.

25. For the amusement of insanes Rs. 3,015 were spent as compared with Rs. 2,241 expended in 1919 and Rs. 2,224 in 1918. The average expenditure under this head for the triennial period was Rs. 2,493 against Rs. 2,619 for 1915—1917.

STATEMENT NO. X.

Receipts and expenditure on account of manufacture.

26. The total credits of the Manufacturing Department amounted to Rs. 17,749 and debits to Rs. 5,645, showing a profit of Rs. 12,104 in 1920 as compared with Rs. 10,504 in 1919 and Rs. 11,327 in 1918. The mean profit for the triennium was Rs. 11,312 against Rs. 7,709 for 1915—1917.

27. Insanes continue to be employed chiefly in gardening and in performing domestic duties connected with the asylums. Those who are capable of working in the asylum factories are employed on weaving and cane work. The average number of insanes employed during the triennium was 367·4 against 419·9 in 1915—1917.

Visitors.

28. The official visitors were regular in their attendance at all the asylums.

Management.

29. The general management of the asylums has been satisfactory.

I have the honour to be,

Sir,

Your most obedient servant,

W. E. JENNINGS,
M.D., Major-General, I. M. S.,
Surgeon-General with the Government of Bombay.

BOMBAY: PRINTED AT THE GOVERNMENT CENTRAL PRESS.

Triennial Report.

Lunatic Asylums in the Bombay Presidency for the years 1918-20.

GOVERNMENT OF BOMBAY.

GENERAL DEPARTMENT.

Order no. P.—53.

Secretariat, Fort, Bombay,

Dated the 6th September 1921.

Letter from the Surgeon General with the Government of Bombay, no. D.—2696, dated the 28th June 1921 :—

"I have the honour to forward the Triennial Report on the Lunatic Asylums of the Bombay Presidency for the years 1918-1920 and to state, for the information of Government, that there is nothing in it the immediate publication of which can be considered of doubtful expediency.

Memorandum to the Government Central Press no. 8840, dated the 19th July 1921.

ORDER.—Recorded.

By order of the Government of Bombay
(Transferred Departments),

S. N. ZIMAN,
Deputy Secretary to Government.
